

Laclede Gas,

St. Louis, Missouri

(7) 12,500 GPH vaporizers at 325 PSIG Discharge

Note: This has been an ongoing replacement program of older vaporizers (see far right and far left). The “smaller” vaporizer (3rd from right) was provided by a competitor. Never would operate and will be removed). All vaporizers since that purchase have been Ely Energy. Last unit provided was in 2007, our 7th since 1997.
